Trusted retailer network

TALK TO YOUR LOCAL VALOR RETAILER ONE OF MANY IN OUR TRUSTED RETAILER NETWORK

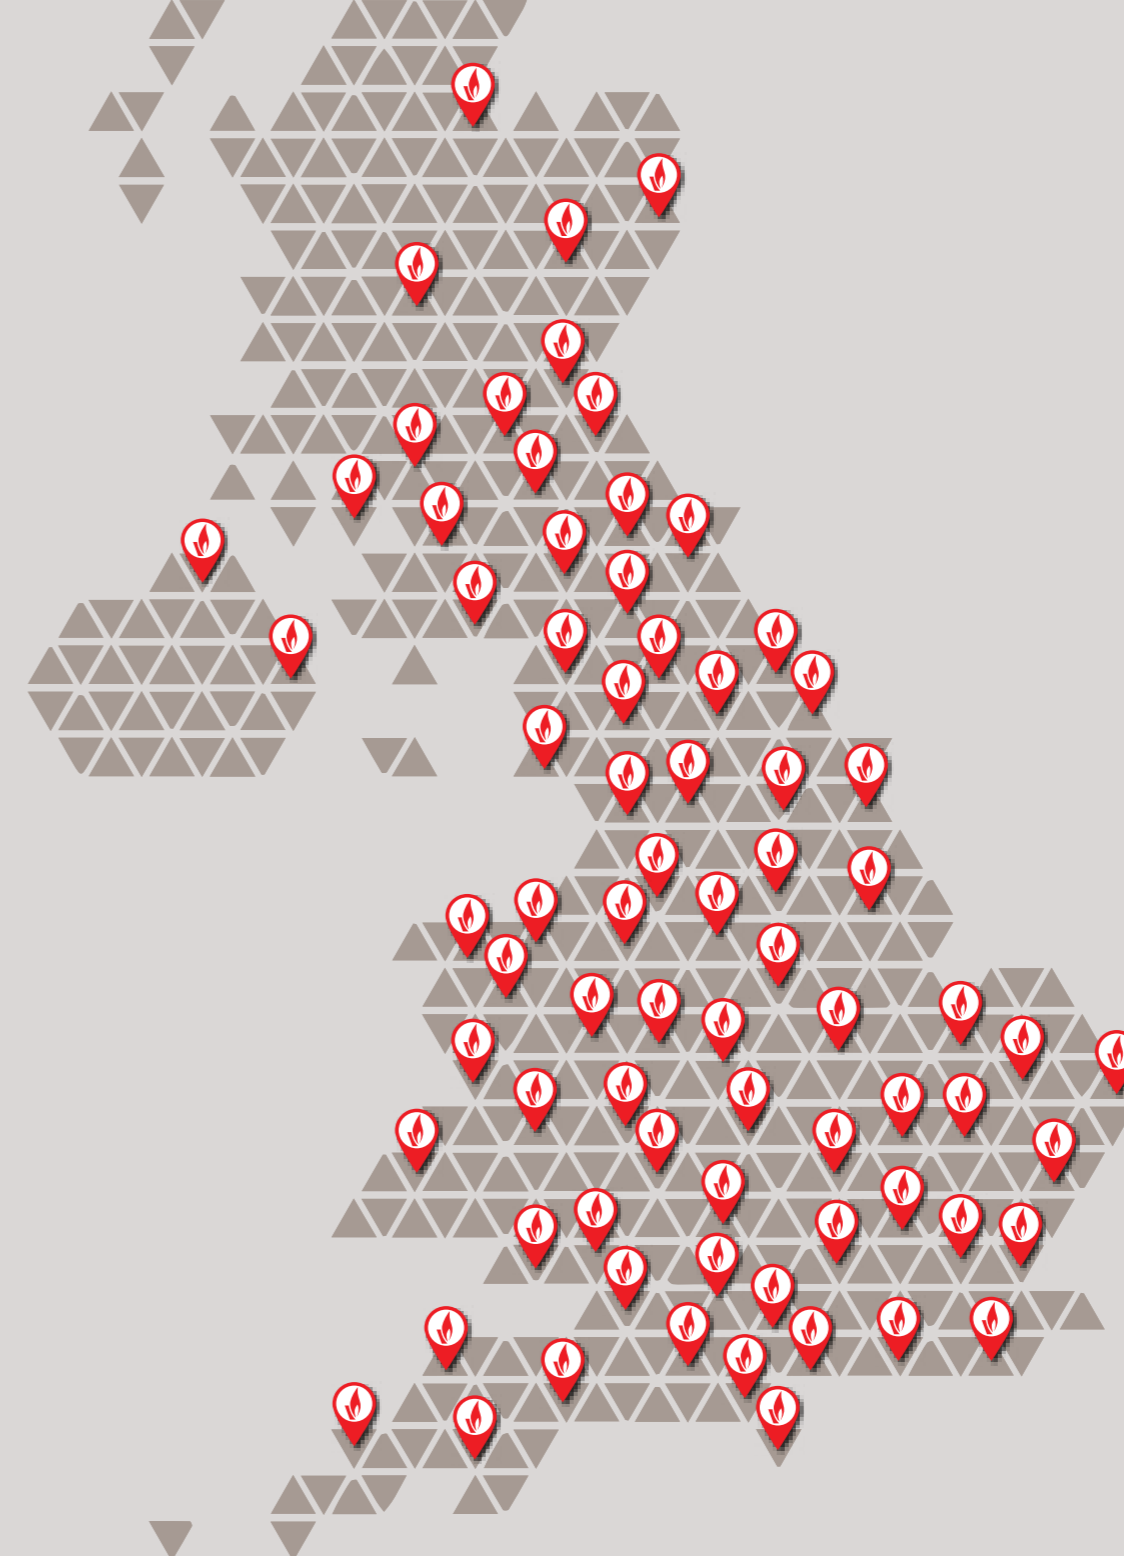

We aim to make owning a Valor fire a truly enjoyable experience, so our trusted Valor Centre Retailers provide the highest level of knowledge and experience. Their job advising you begins when you start your search for a fire.

Whether it's a simple replacement or you're starting your search from scratch, we know that making your purchase decision can sometimes be a confusing and daunting experience. It needn't be. That's why we're here to take out the hassle and demystify all the technical information that comes with it – come to us and all you need to do is choose a beautiful fire which will light up your room and give you the cosy ambience you've always wanted for your home.

Visit your local independent Valor Retailer and we'll make a promise to you:

1. Choose your dream fire from one of the many live Valor displays we have in-store – seeing is believing
2. Receive **trusted advice and recommendation** from an industry expert to find a fire tailored to you
3. Have your fire **installed by safety assured professionals**
4. **Extended 3 year warranty**, exclusive to Valor Centres, gives you peace of mind your fire will serve you for many years*
5. We'll be on hand to provide advice and **back-up support** as part of an annual service agreement

*One year as standard, two additional years upon registration. See page 5 for full details.

Visit our website to find your local trusted Valor Centre retailer

www.valor.co.uk/mylocalretailer

Relax and enjoy the cosy ambience of your Valor fire knowing it's been supplied and installed by professionals to the very highest standards.

Valor Centre 3 Year Guarantee

When you purchase a Valor fire you do so with the utmost confidence that it will serve you for many years to come. Such is the confidence in our products, that when you purchase a Valor fire from a Valor Centre retailer, you are entitled to a free upgrade from our standard 1-year guarantee to a 3-year guarantee. To take advantage of this, simply complete the online registration within 28 days of purchase at www.valor.co.uk/register, or call us on **0344 879 3588** if you do not have access to the internet. Products must be installed in accordance with the manufacturer's instructions and maintained in line with the Terms & Conditions, which includes an annual service. For full terms and conditions visit www.valor.co.uk/terms. To find your nearest Valor Centre, please visit www.valor.co.uk/find-a-retailer.

Allure Inset Fires

Allure is perfect for anyone desiring the cosy ambience of an open fire, but without the hassle.

The fires in the Allure range, combine the latest gas technology with the realism of an open fire thanks to a deep, realistic coal effect fuel bed, warm cosy glow and open fronted design for a mix of radiant and convected heat.

There are five different designs to choose from and all come with a choice of four colour finishes, two trim options and three control options.

Sit down, switch on, relax.

*Allows fire to be fitted flat to the wall.

Technical Information

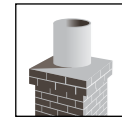

Choosing the correct fire for your home

With the many advancements in fire technology it is easy to get confused. We have laid out the Valor range options in an easy to view matrix, so you can compare the different fire types and pick the one perfect for you and your home. As well as considering what type of fire you want, you also need to know what type of chimney/flue your property has.

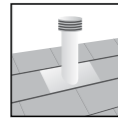

What type of chimney does your home have?

Look at the pictures and decide which one best matches the chimney at your home then, when you're reading through our brochure and find a fire you like, simply check the icon to see if it's suitable for the chimney at your property.

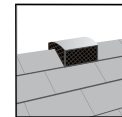

Brick Chimney (BC)

Suitable for all fires. The classic brick built chimney can handle fires with a deep fuel bed right through to shallower slimline styles.

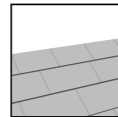

Pre-fabricated Flue (PF)

Suitable for most fires, dependent on the flue depth and diameter.

Pre-cast Flue (PCF)

Suitable for a wide range of slimline, gas fires and all electric models.

No Chimney (NC)

Even if you have no chimney or flue, we have a selection of fires for you. Our balanced flue and electric fires are the solution here.

Convector

Convactor fires give out radiant heat as they are open fronted but also draw in cold air from the room, pass it through a heat exchanger to warm it up and then circulate it back around the room. The result is that the room is heated much faster than by radiant heat alone.

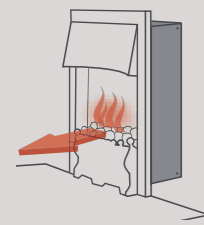

High Efficiency

Valor's dedicated research and development facility combines the latest technology with innovative techniques to ensure our products offer the highest possible efficiency. Our High Efficiency range of gas fires are amongst some of the most efficient gas fires available and will help you save on running costs while our balanced flue and radiant gas fires also offer impressive efficiencies.

Electric Collection – All electric fires are 100% efficient at point of use, which means for every kW of energy used you get the same kW heat output from the fire.

What type of fire do you want?

Fireplace Openings

Key to Technical Table

Hearth & WM Can be hearth or wall mounted – ashpan is not separate.
Hearth Can be hearth or wall mounted. If wall mounted the fire would require a small plinth to support the fret/ashpan which is not attached to the main fire.
NB: Please note that the fires which are highlighted as 'Hearth' are intended for floor level installation with a back panel and hearth. If raised some of the inner workings of the fire may become more visible than intended.
† These fires are suitable for most pre-fabricated flues dependent on the flue depth and diameter. Please refer to the installation instructions to ensure that this fire is compatible.
> Inset balanced flue fires can be installed inset/semi-inset into the wall cavity with the 3" spacer, which is available as an optional extra.

Note: Due to the sheer number of varying flue boxes and pre-cast flues it is not possible to advise on which fires are suitable until the existing fire has been removed. If the width at the rear of the pre-cast flue starter blocks is less than 300mm wide the minimum depth of the opening will be not less than 154mm.
Due to the unique cast plating process, we cannot guarantee an exact colour match to product viewed in showrooms, online and printed literature.
Fire Surrounds: Most of the fire surrounds featured in this brochure were supplied by Trent Fireplaces. For further information, please visit www.trent-fireplaces.co.uk or call 0115 979 0330.
